Focused Web Developer with more than two years of experience in a fast-paced environment. Dedicated to work independently and as part of a team to consistently deliver high-quality result.

## Work Experience

### Projects Web Developer

Jan 2023 - Present

*Scorpion*

- Consistently surpassed expectations by flawlessly completing projects and continuously being on of the top performers in daily tasks.
- Encouraged innovation and collaboration with UX and project management teams, adhering to design patterns, never missing a deadline.
- Generated over \$100k revenue through scalable, innovative projects, using best practices and developing maintainable code.

### Web Developer

Nov 2021 - Dec 2022

*Scorpion*

- Comprehensive problem solving skills with technologies such as JavaScript, HTML, CSS, SQL and basic C#, along with DNS configuration.
- Maintained, repaired, and developed efficient front-end development features across 100 franchise web applications for improved customer experiences.
- Regularly surpassed task completion targets, often achieving nearly two times the required amount.

### Web Developer

Jul 2021 - Jul 2021

*Freelance*

- Oversaw all stages of web development, from the creativity on initial concept with Figma to delivering a high-quality website revamp using React, Javascript, and Google Maps API.
- Boosted page speed by 25% through implementing intuitive design patterns for improved mobile accessibility.
- Used this as an opportunity to learn by applying academic skills to real world scenarios, enhancing my professional knowledge.
